

WIRE-Net

Where Manufacturing Matters

2014 WIRE-Net Annual Report

Letter from the Board Chair and President

Manufacturing has been a key driver of the economic recovery, and WIRE-Net is wholly committed to the long term success of manufacturing in Northeast Ohio. After evaluating and prioritizing the needs of WIRE-Net's members, our 2013-2015 Strategic Direction set two significant plan objectives:

- 1) Strengthen the education and skills training programs that build a skilled workforce, and assist manufacturers in hiring and training good people
- 2) Connect manufacturers to resources to help them prosper, through top line revenue growth and below the line cost savings/economies

WIRE-Net's 354 members employ over 21,000 people, representing over one billion in wages, a valuable economic asset for our community. We are experiencing tremendous growth in membership, with 95 new companies joining our manufacturing community in 2014. WIRE-Net's high touch, responsive problem solving has driven some of this growth. Our experienced staff focuses on face-to-face meetings to identify challenges and find solutions.

Another key has been WIRE-Net's role as a convener, creating valuable learning and networking opportunities in a variety of venues: peer to peer roundtables, seminars with industry experts, Lunch 'n' Learn forums, and plant tours. WIRE-Net generated some excitement as we convened an Apprenticeship Consortium kick-off, hosted two Supervisory Certificate I Trainings, and launched two Lean Learner's Groups. Reaction to our first two Lean Implementation Learner's Groups has been overwhelmingly positive, as nine companies are undertaking projects and sharing their success with each participating company. This work will continue in 2015.

"Aetna Plastics has greatly benefited from WIRE-Net's Lean Implementation Group," says Andrew Gotschall, Manager for Quality and Process Improvement at Aetna Plastics Corp. "It has helped us build a foundation and roadmap for our lean program through the unique combination of classroom discussion and on-site plant tours. What makes this group truly special is the ability to share ideas and learn from like-minded businesses in our own backyard."

Training, educational and networking events are all integral components of our strategy, as we work with our partner, MAGNET, to Accelerate Cleveland Manufacturing in Cleveland; and with our regional partners at TeamNEO and Ohio Means Jobs-Medina County with whom we work in the Advance NEO project. Both projects share a common focus to accelerate manufacturing growth.

Tim Rosengarten

Chair, WIRE-Net Board of Directors

John Colm
WIRE-Net
President and Executive Director

CIRI

The Cleveland Industrial Retention Initiative (CIRI) is a program of the [City of Cleveland](#), managed by WIRE-Net. In 2014 the team of five CIRI Industrial Development Managers:

- ◆ Delivered in-plant support to 510 unique Cleveland manufacturing firms employing 18,100 people
- ◆ Conducted 550 total visits to uncover opportunities and challenges at Cleveland's industrial companies (includes follow-up visits)
- ◆ Completed 430 services primarily in the areas of general business assistance (includes operational cost savings, utility assistance, and marketing & sales diversification) real estate, infrastructure, and safety & security
- ◆ Posted more than 1,100,000 square feet of real estate to Ohio One in order to help companies purchase, sell, or lease available space and ultimately retain Cleveland businesses
- ◆ Completed parcel level analysis of target redevelopment sites in Ward 8, and organized business stakeholder meeting for 23 companies in Ward 8

- ◆ Delivered **service interventions** to **15 firms** that met one of these criteria: **new jobs could be added, jobs were at risk, costs were reduced, or investment was made. 2014 Cleveland Economic Impact:**

1. **974 direct manufacturing and related jobs**
2. **\$42 million annual payroll plus \$308,000 in potentially new payroll associated with job creation***
3. **\$840,000 in annual payroll taxes paid to the City**
4. **\$6 million in retained sales**
5. **More than \$79,000 in cost reductions****
6. **More than \$3.3 million in investment**

** Payroll is estimated based on payroll data from the State of Ohio Labor Market Information System.
** Cost Reductions include reduction in operation cost associated with supply purchases, shipping, security, and energy management*

CLEVELAND INDUSTRIAL RETENTION INITIATIVE

A Program of the City of Cleveland

The dumping at West 3rd Street and Quigley Road is on the City of Cleveland's radar for cleanup and monitoring. The site was a point of discussion at CIRI Illegal Dumping and Metals Theft meetings first held in 2014.

GLWN

GLWN was launched as the Great Lakes WIND Network in 2007 to grow the supply chain for the wind industry, identify critical needs, and connect manufacturers and suppliers with new customers. The initiative has grown both geographically and in scope to work with wind farm developers, OEMs, and economic development departments to increase the domestic content of America's wind turbines.

GLWN conducted original research for the U.S. Department of Energy on the extent and competitiveness of America's offshore wind supply chain. We are also coaching communities adjacent to Cape Wind in Massachusetts, and assisting Lake Erie Energy Development Corporation (LEEDCo) on their Lake Erie wind farm project.

- ◆ Researched and published [U.S. Wind Energy Manufacturing and Supply Chain: A Competitiveness Analysis](#)
- ◆ Submitted and awarded a contract proposal to U.S. Department of Energy to lead supply chain activities in fuel cell technology
- ◆ Published the Manufacturing Clean Energy Series Case Studies: *Manufacturing Successes and Challenges in Clean Energy*

[Stay the Course, Manufacturer: Talan Products Inc.](#)

[Offshore Wind Market Offers New Opportunities for U.S. Manufacturers: AT&F](#)

Manufacturing Services

In 2014, WIRE-Net and strategic partner, [MAGNET](#), combined forces to Accelerate Cleveland Manufacturing, a unified core city manufacturing strategy made possible through the generous support of The Cleveland Foundation. Through the combination of the WIRE-Net Member Network and relationships, and MAGNET PRISM, we aim to jointly grow jobs and revenue for Cleveland companies and arrange skills training for Cleveland residents.

- ◆ **15 companies visited, assessed, and offered project proposals**
- ◆ **Two Lean Implementation Learners Groups launched assisting nine firms with a project inside their plant; facilitated by MAGNET's Mike O'Donnell.**

... from our satisfied members

"Martindale Electric has gained a lot of lean knowledge for the front-line supervisors through our participation in WIRE-Net's Lean Implementation Group. Through the reinforcement of plant tours at the different participant companies, that knowledge has been expressed in a practical way and not just in theory. Our company project has tied it all together to benefit Martindale with shop floor improvements and the beginnings of a continuous improvement culture."

– Linas Biliunas, President, Martindale Electric Co.

"The greatest benefit to Cleveland Steel Tool has been spreading the gospel of Lean and 5S past the senior management level, to allow foremen and machine operators to hear from their peers about the benefits of the process. Sharing ideas within a controlled environment is a far superior learning technique than internet videos or classroom pedagogues."

– Mark Dawson, President, Cleveland Steel Tool Co.

Workforce Development

Adult Programs

WIRE-Net workforce programs and services address employers' workforce needs critical to the profitable operation of any manufacturing business.

2014 Adult Workforce Program Highlights:

- ◆ Received 31 **WorkSource** job orders for skilled or professional positions from 21 unique companies
- ◆ [WorkSource Program Fills Job in Less Than 30 Days](#)
- ◆ Made 14 job placements at an average wage of \$18.76/hour
- ◆ Launched a pilot initiative with nine employers to promote manufacturer sponsored apprenticeship programs focused on Industrial Maintenance Engineer certification
- ◆ **WorkAdvance** – developed incumbent working training strategy with two employers to provide backfill opening for program entrants

In Year 4 of a 5 year program, WorkAdvance is a county-wide sector-based workforce strategy designed to help fill "gateway" jobs, promoting job opportunities through skill building and career coaching. The program helps employers find and promote new talent.

WIRE-Net works closely with our strategic partner, [Towards Employment](#), by vetting candidates, offering relevant skill training and matching job candidates with manufacturers. WIRE-Net focuses on managing the employer relationships, and Towards Employment delivers quality direct services to job seekers.

Our partnership continues to grow and evolve with new collaborative opportunities opening in WIRE-Net's Apprenticeship Accelerator and Towards Employment's Pathways 2 Work Initiative launching in 2015.

ERC Supervisory I Certificate Training at WIRE-Net

Workforce Development

Youth Programs at Max S. Hayes High School

WIRE-Net continues our community collaboration to prepare students for 21st Century jobs in manufacturing, construction, transportation, and information technology sectors at the new Max S. Hayes Career and Technical High School. The collaboration includes the Cleveland Metropolitan School District, TEAM Academy, the Greater Cleveland Partnership, local foundations, businesses, and colleges, WIRE-Net, and the community. We are excitedly waiting for the new Max Hayes school building scheduled to open in August 2015.

WIRE-Net accomplishments from our [2014 Stakeholder Report](#) include:

- ◆ Managed a Summer Camp to introduce 54 incoming 9th grade students to Max Hayes' unique career and academic programs.
- ◆ Placed 53 students in internships and summer jobs
- ◆ Launched planning phase for an Encore Fellows program utilizing retired technicians with the support of The Cleveland Foundation
- ◆ Provided business liaison services to the Cleveland Metropolitan School District (CMSD) to connect manufacturing companies to the classroom, such as our visit to Voss Industries on Manufacturing Day in October

[Voss Industries Hosts Max Hayes Students on Manufacturing Day](#)

To celebrate Manufacturing Day on October 3rd, eighteen Max Hayes Career Tech students and three chaperones toured the Voss Industries 250,000 square foot plant and spoke with some of the 300 employees.

Membership

WIRE-Net's 354 members employ over 21,000 people, representing over one billion in wages, a valuable economic asset for our community. We are experiencing tremendous growth in membership, with 95 new companies joining our community in 2014. WIRE-Net's high touch, responsive problem solving has driven some of this growth. Our experienced staff focuses on face-to-face meetings to identify challenges and find solutions. The more you participate, the more you gain from your WIRE-Net membership!

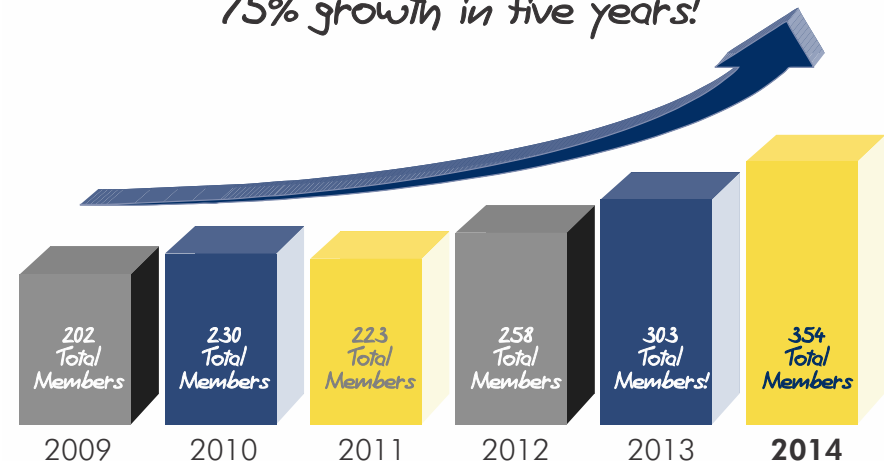

- ◆ 95 New Members for a total of 354 Members
- ◆ 89% Member Retention Rate
- ◆ 2531 individuals attended 45 Events
- ◆ Event Registration up 41% over last year (sold out Vitamix Plant Tour, Annual Meeting, and Lincoln Electric Tour)
- ◆ WIRE-Net became an Ohio Certified Workers' Compensation Sponsor and launched Spooner Inc. partnership for [BWC Workers Compensation Group](#)
- ◆ Hosted first ERC Supervisory Certificate I Training for 24 front line supervisors.
- ◆ In our effort to grow bottom lines, WIRE-Net teamed up with several member cost savings programs. Only a small percentage of our members participated, but results were outstanding! Member Total Annual Cost Savings: \$181,364

- ✓ ERC Supervisory Training: 24 people – **\$4,440** savings
- ✓ NorthEast Energy Advisors: 4 companies – **\$52,500** in annual savings
- ✓ NTMA-Grainger Supply: 39 companies – **\$71,268** in savings
- ✓ PartnerShip: 20 companies saved **\$53,156** in shipping costs

WIRE-Net Membership is **Growing!**
75% growth in five years!
