SEA AIR SPACE MACHINING & MOLDING, LLC

Sea Air Space Machining & Molding, LLC has shown their commitment to the Greater Cleveland area through ongoing reinvestment in their Solon operations. Over \$5 million has been invested by Sea Air Space in new equipment over the past two years, which places the company in a strategic niche with very few competitors. Long-term growth is the driving force at Sea Air Space.

For the second consecutive year, Sea Air Space projects it will add 10 to 15 new high-paying jobs. Their employees share in the company's profits, which encourages individual participation and promotes good decision making for the long-term benefit of the company.

Sea Air Space also supports the Northeast Ohio manufacturing community. Over the past year, they have hosted or presented three WIRE-Net workshops which were designed to help area manufacturers evaluate aerospace as a potential new market opportunity.

Reinvestment in equipment and people, as well as community involvement, is making a difference in Northeast Ohio manufacturing.

WIRE-Net

Where Manufacturing Matters

Since 1990, WIRE-Net has recognized companies and individuals who demonstrate—through their extraordinary efforts—a commitment to WIRE-Net's mission and values. Mission Builder Award winners are companies that exemplify our mission, which is to strengthen manufacturing to create healthy communities and fuel economic growth.
