2009

SHORELINE MACHINE PRODUCTS, INC.

Since 1990, WIRE-Net has recognized companies and individuals who demonstrate—through their extraordinary efforts—a commitment to WIRE-Net's mission and values. Mission Builder Award winners are companies that exemplify our mission, which is to strengthen manufacturing to create healthy communities and fuel economic growth.

Shoreline Machine Products, Inc. is expanding its operation in Cleveland by renovating a vacant building next door to their current manufacturing plant. The 10,000 square foot addition will cost approximately \$250,000. Funding for the project was obtained through the Cleveland Economic Development Vacant Property Initiative (VPI). This new addition has allowed Shoreline to invest in Cleveland and consolidate their Canton operations to Collinwood, which will bring five new jobs to the community while retaining their 22 current employees.

Shoreline has become active in the Cleveland manufacturing community. They have recently joined WIRE-Net and become involved in various seminars, are participating in peer committees, and they were active participants in WIRE-Net's 2009 Northeast Ohio Manufacturing Summit last February.

By investing in the Collinwood neighborhood and their employees, Shoreline Machine Products is doing its part to advance Northeast Ohio's manufacturing community.
