UniControl Inc.  
1111 Brookpark Road  
Cleveland, OH 44109

August 25, 2010

As a mature manufacturing company in Cleveland, historically serving relatively mature, domestic markets, UniControl employees strive for continuous improvement to stay competitive and financially prosperous. Every aspect of our manufacturing business can benefit from continuous improvement so "all cylinders of our business engine are firing" with optimal, coordinated effectiveness and flow: Sales & Marketing, Engineering, Production, Quality, Finance, HR, etc.

But like most small companies, our limited resources are focused on a few, strong competencies, leaving many other important activities in need of outside assistance and guidance. This is where WIREnet comes in. Through a very reasonably-priced membership, UniControl has received professional assistance in areas beyond our internal skill-base and resources, such as:

- Training & Best Practices
- Market Research and New Product Development
- Workforce Development and Recruiting
- Government Access & Advocacy
- Grants and Technical Assistance
- Business to Business Networking.

The return on our WIREnet membership investment has been ten-fold and immediate. WIREnet has proven to be an invaluable resource to our manufacturing achievements.

Sincerely,

Steven Craig  
President
